Brainstorm & Idea Prioritization

The project focuses on streamlining the Standard Laptop procurement process in ServiceNow. The solution automates the creation of a Catalog Task after the Standard Laptop request is approved and assigns the task to the Hardware team for configuration.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement:

How might we automate the creation and assignment of configuration tasks for approved Standard Laptop requests so that IT Procurement can reduce manual effort and processing delays?

Project Objectives:

- Automate the creation of a Catalog Task for an approved Standard Laptop request.
- Automatically assign the configuration task to the Hardware team.
- Reduce manual intervention and the possibility of missed or delayed tasks.
- Improve visibility and consistency in the laptop procurement workflow.

Template

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

Project Details

Project Name

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Date

03 October 2026

Team ID

SWTID-2026-1749

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B

Set the goal

Identify possible solutions to automate the Standard Laptop procurement process in ServiceNow.

C

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Team and Goal for this Session

Team Members:

- Barani M – Team Leader
- Sukrita D – Team Member
- Bhavasri R – Team Member
- Monisha S – Team Member
- Logeshwari S – Team Member

Goal:

Brainstorm and identify suitable approaches to automate the creation and assignment of configuration tasks for approved Standard Laptop requests and select the best solution.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we automate the creation and assignment of configuration tasks for approved Standard Laptop requests so that IT Procurement can reduce manual effort and processing delays?

Key rules of brainstorming

To run a smooth and productive session

 Stay in topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Potential ideas for solving the identified problem:

Idea Group	Brainstormed Idea
Automation	Use Flow Designer to automatically create a Catalog Task after approval.
Task Assignment	Automatically assign the generated task to the Hardware group.
Request Data Mapping	Pass the Requested Item record into the Catalog Task.
Business Rule	Create and route the configuration task using a Business Rule.
Traditional Workflow	Use a ServiceNow Workflow to manage task creation.
Notifications	Notify the responsible team when the configuration task is created.

2

Brainstorm
Write down any ideas that come to mind that address your problem statement.
10 minutes

TIP

You can select a sticky note and hit the pen toolbar to sketch icons to start drawing!

Barani M	Sukrita D	Bhavasri R	Monisha S	Logeshwari S
Create flow in Flow Designer	Assign task to Hardware team	Trigger flow after approval	Reduce manual task creation	Set short description automatically
Add Service Catalog trigger	Auto-fill task details	Activate and save flow	Prevent missed configuration tasks	Track task in Requested item
Auto-create Catalog Task	Pass Requested item record	Attach flow to catalog item	Improve request processing time	Verify with test order

3

Group ideas
Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
20 minutes

Automation	Task Assignment	Process Improvement
Create flow in Flow Designer	Assign task to Hardware team	Reduce manual task creation
Add Service Catalog trigger	Auto-fill task details	Prevent missed configuration tasks
Auto-create Catalog Task	Pass Requested item record	Improve request processing time
Trigger flow after approval	Set short description automatically	Activate and save flow
Attach flow to catalog item	Track task in Requested item	Verify with test order

Step-3: Idea Prioritization

The ideas are prioritized based on feasibility, impact on the procurement process, and ability to reduce manual intervention.

Approach	Feasibility	Impact	Priority
Manual Catalog Task Creation	High	Low	Low Priority
Business Rule	Medium	High	Medium Priority
Traditional Workflow	Medium	High	Medium Priority
Notification-based Follow-up	High	Medium	Supporting Feature
Flow Designer	High	High	Selected Idea

Selected Idea

Flow Designer-based Standard Laptop Procurement Automation

Flow Designer is selected as the primary automation approach because it integrates with the Service Catalog process and can create the required Catalog Task, map the Requested Item, and assign the task to the Hardware group.

Proposed Process

1. Standard Laptop request is submitted through the Service Catalog.
2. The request is approved.
3. Flow Designer is triggered.
4. A Catalog Task is automatically created.
5. The Requested Item is mapped to the task.
6. The task is assigned to the Hardware team.
7. The Hardware team performs laptop configuration.

Expected Outcome

- Reduced manual task creation and assignment.
- Faster handling of Standard Laptop requests.
- Clear ownership through automatic assignment to Hardware.
- Improved visibility and consistency in the procurement workflow.
