

Acceptance Testing

UAT Execution & Report Submission

Date	03 October 2026
Team ID	SWTID-2026-1749
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Purpose of Document

This document presents the User Acceptance Testing (UAT) status for the Streamlining IT Procurement project. The solution uses ServiceNow Flow Designer to automate the creation of a Catalog Task after a Standard Laptop request is approved and assigns the task to the Hardware team for configuration.

2. Defect Analysis

The project implementation material does not contain a separate defect log. Therefore, the defect summary below records the documented defect position without inventing individual bug records or severity counts.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

Note: The zero values indicate that no defects in these categories were documented in the supplied project material; they do not claim that no development issues ever occurred.

3. Test Case Analysis

Seven functional verification cases are used for the documented Standard Laptop procurement workflow. All seven are treated as passed because the supplied implementation evidence shows the expected result for each stage.

Section	Total Cases	Not Tested	Fail	Pass
Service Catalog Request	1	0	0	1
Approval Process	1	0	0	1
Flow Designer Trigger	1	0	0	1
Catalog Task Creation	1	0	0	1
Hardware Assignment	1	0	0	1
Requested Item Mapping	1	0	0	1
End-to-End Procurement Flow	1	0	0	1
Totals	7	0	0	7

Acceptance Testing

UAT Execution & Report Submission

4. UAT Test Coverage and Results

Test ID	Test Scenario	Expected Result	Result	Status
UAT-01	Submit Standard Laptop request	Requested Item is created.	Requested Item available	Pass
UAT-02	Approve the request	Approval state becomes Approved.	Approval shown as Approved	Pass
UAT-03	Trigger Standard Laptop Flow	Configured Flow Designer process runs.	Flow configured for approved request	Pass
UAT-04	Create Catalog Task	Catalog Task is generated.	Catalog Task generated	Pass
UAT-05	Assign task to Hardware	Task is routed to Hardware group.	Assignment group = Hardware	Pass
UAT-06	Verify task details	Task contains configured request details.	Short description and request details present	Pass
UAT-07	Verify final workflow result	Approved request results in an actionable Hardware task.	Task state Open; approval Approved	Pass

5. Open Issues

No unresolved defects are documented in the supplied project implementation material. The documented final result shows the Catalog Task assigned to the Hardware group, with approval marked Approved and the task in the Open state.

6. UAT Acceptance Summary

Total Test Cases	7
Passed	7
Failed	0
Not Tested	0

7. Conclusion

Based on the documented implementation evidence, the Standard Laptop procurement automation meets the defined workflow expectations: an approved Standard Laptop request leads to automatic Catalog Task creation and assignment to the Hardware team. The UAT summary records 7 passed functional checks, with no failed or untested cases in the documented workflow.

8. UAT Evidence Reference

- Service Catalog: Standard Laptop request and Requested Item.
- Approval: Requested Item approval shown as Approved.
- Flow Designer: Standard Laptop Task flow with Create Catalog Task action.
- Catalog Task: Assignment group Hardware.
- Final task: Short description "Laptop needs to Configured" and state Open.
